**AMENDMENTS TO THE ABSTRACT:**

Please replace the Abstract with the following re-written paragraph:

B2  
~~10019~~ A differential mechanism with offset, self-aligning spherical side gears and wider side gear separation to provide differential mechanism that is less expensive and easier to assemble. The differential mechanism includes a centerpoint of one surface or gear that is offset from a centerpoint of the chamber or casing along an axle centerline in a direction away from an opposing surface or gear.--
